OXCART

1. WE HAVE RESTUDIED THE VARIATION OF FOCAL POSITION AND EMULSION POSITION IN OUR SYSTEM. PART OF THIS VARIATION IS THE VARIATION OF FILM THICKNESS.
2. THEREFORE, WE HAVE SOME QUESTIONS:
 - (A) WHAT IS THE THICKNESS VARIATION IN ANY SINGLE UNSPLICED LENGTH?
 - (B) WHAT IS THE THICKNESS DIFFERENCE FROM ONE PIECE TO ANOTHER?
 - (C) CAN YOU ARRANGE TO MAKE THIS DIFFERENCE (PARA 2B) VERY SMALL (SAY 0.0001 INCH) ON A SINGLE SUPPLY SPOOL OF 5000 FEET HAVING SPLICES?
 - (D) CAN YOU MEASURE NOMINAL THICKNESS AND LABEL SUPPLY SPOOL CONTAINER?
3. REQUEST ANSWERS WITHIN TWO WEEKS.
